Workday Customers Live on Amazon Web Services

Customers in North America Including Fresche Solutions and Twitch Now Run Workday on AWS; Workday Plans to Offer AWS Option to Customers in Germany in 2019

PLEASANTON, Calif. and VIENNA, Austria, Nov. 14, 2018 (GLOBE NEWSWIRE) --**WORKDAY RISING EUROPE** -- Workday, Inc. (NASDAQ: WDAY), a leader in enterprise cloud applications forfinance and human resources, today announced that customers including Fresche Solutions and Twitch are now running Workday applications onAmazon Web Services, Inc. (AWS).

The announcement signals a milestone for Workday as this is the first time that its customers are running its suite of applications – including Workday Financial Management and Workday Human Capital Management – in the public cloud. Furthering the reach of Workday running on AWS, which is currently available to customers headquartered in Canada as well as select customers in the US, Workday also announced that it plans to extend the offering to customers in Germany in the first half of 2019, with additional geographies to follow based on customer demand.

Customers that select to run Workday on AWS benefit from:

- **Greater Choice:** With the dynamic nature of business today, organizations have a greater need for choice when it comes to running mission-critical applications to grow their business. As part of its commitment to customers – demonstrated by a 98 percent customer satisfaction rating – Workday running on AWS equips customers with more freedom to choose how and where they run Workday applications – be it on AWS or in Workday data centers.
- **Zero Downtime:** To further ensure Workday customers can plan, execute, and analyze whenever the business requires, Workday has committed to applying weekly service updates with zero downtime – meaning minimal disruption so Workday remains always-on. With the use of a single codeline, Workday has already made significant strides toward this goal in its own data centers, and customers will be able to take advantage of the AWS cloud, which is architected for zero downtime, beginning in the first half of 2019.
- **Increased Flexibility:** Customers in regions all over the world have varied requirements regarding where their data can be stored, accessed, and managed. Running Workday on AWS, customers can address those commercial data requirements while maintaining the enterprise-grade security, scalability, and performance they expect from a trusted cloud leader. Additionally, running Workday on AWS further streamlines the technology landscape for the many customers already running other production workloads and applications on AWS.

Comments on the News

“With Workday running on AWS, we equip customers with yet another lever to accelerate their own innovation, so they can better manage and grow their businesses,” said David Clarke, senior vice president, technology development, Workday. “Workday is fully committed to driving scale, high availability, flexibility, and an amazing cloud ERP platform for all of our customers – both on AWS and in our own data centers – for the long term.”

“Workday and AWS have had a strong relationship for more than ten years, and we count some of the world’s most innovative companies among our mutual customers,” said Kurt Kufeld, vice president, AWS Platform, Amazon Web Services, Inc. “Delivering Workday’s suite of applications on AWS is a notable milestone in our mission to enable organizations around the world to take advantage of the full scale, reliability, and performance of AWS.”

“Running Workday on AWS fits into our broader focus on putting people first by taking advantage of modern computing practices and technologies to improve business processes and develop customer-facing applications,” said Patrick Thibault, chief financial officer, Fresche Solutions. “As one of the first customers running Workday on AWS in Canada, we are able to leverage the cloud ERP platform to better run our organization and serve our customers.”
