Workday Announces New AI Agent Partner Network and Agent Gateway to Power the Next Generation of Human and Digital Workforces

Accenture, AWS, Google Cloud, Microsoft, PwC, and Others Will Connect their AI Agents to Workday's Agent System of Record, Enabling Seamless Agent Collaboration and New Levels of Productivity

New Agent Gateway Will Enable Partners to Seamlessly Connect and Integrate Agents with Workday to Streamline Workflows Across Leading Platforms

Customers Can Now Find and Deploy Powerful AI Agents from Workday and Partners on Workday Marketplace

LAS VEGAS, June 3, 2025 /PRNewswire/ -- **Workday DevCon 2025** -- Workday, Inc. (NASDAQ: WDAY), the AI platform that manages people, money, and agents, today announced the Workday Agent Partner Network, a global ecosystem of partners building AI agents that will connect with the Workday Agent System of Record (ASOR). Industry leaders including Accenture, Adobe, Amazon Web Services (AWS), Auditoria.AI, Compa, Deloitte, Glean, Google Cloud, IBM, Kainos, KPMG, Microsoft, Paradox, PwC, and WorkBoardAI are among the first to partner with Workday to help joint customers thrive in a future where AI agents are a central part of how work gets done.

Workday also announced Agent Gateway, which will enable customers to seamlessly connect and manage AI agents from Workday and its Agent Partner Network within the Workday Agent System of Record.

"For nearly two decades, Workday has helped organizations manage their people and their money on a unified, secure platform," said Matthew Brandt, senior vice president, global partners, Workday. "Now, as AI agents increasingly collaborate with human workforces, customers are looking to Workday to manage everything – people, money, and agents – together on one platform they can trust. That's why we're partnering with leading technology organizations to ensure they can do so seamlessly while maintaining enterprise control."

The Next Generation of Workforce Management

The workforce is undergoing a fundamental shift. It's no longer made up of people alone, but a mix of humans and AI agents working together across every function. These AI agents – tasked with everything from streamlining operations to enabling entirely new ways of working and supporting decision-making – are quickly becoming an essential part of how work gets done. This new reality is reshaping roles, workflows, and the very definition of a team. As digital workers increasingly support workforces, organizations must rethink how they hire, manage, ensure compliance, and measure their impact, just as they would for human employees.

Unlocking the Full Potential of AI Agents in the Enterprise

As AI agents become a core part of the workforce, the Workday ASOR will provide the tools to hire, onboard, assign responsibility, and manage agent outcomes the same way businesses manage people. It will help businesses set clear roles for agents, define what data they can access, control what actions they take, and track their performance – so every human and agent contributor are aligned to business goals. Whether an agent is built by Workday, a partner, or a customer, the Workday ASOR will help ensure it operates securely, efficiently, and with accountability.

By connecting their AI agents to the Workday Agent System of Record, partners including Accenture, Adobe, Amazon Web Services (AWS), Auditoria.AI, Compa, Deloitte, Glean, Google Cloud, IBM, Kainos, KPMG, Microsoft, Paradox, PwC, and WorkBoardAI will help create a more seamless, intelligent, and collaborative experience across systems. This will drive greater efficiency, agility, and impact on how work gets done. It's a critical step toward managing the workforce of the future – one that includes both humans and AI agents.

For example, when a recruiter or hiring manager needs to quickly schedule an interview, they can use the Paradox Interview Scheduling agent within the Workday ASOR. Because Paradox integrates directly to Workday Recruiting, users have access to the Scheduling agent that helps them across the entire interview process, from coordinating scheduling, sending reminders, answering candidate questions, and more.

Agent Gateway: Bringing AI Agents Together Across Systems and Partners

Workday's new Agent Gateway will make it easy for Workday partners to connect their AI agents with Workday's ASOR. Using shared protocols, including Model Context Protocol (MCP) and Agent-to-Agent Protocol (A2A), these agents can collaborate and exchange information seamlessly – whether they're built by Workday or Workday partners. This means Workday Illuminate agents can operate wherever people are working, across systems, to deliver real-time support and automation that saves time and reduces friction.

Introducing AI Agents on Workday Marketplace

Starting today, agents from Workday and its Agent Partner Network are now available onWorkday Marketplace. Workday Marketplace makes it easy for customers to discover, procure, and deploy a wide range of apps and agent solutions that solve their business needs. Illuminate agents available today on Workday Marketplace include Business Process Optimize Agent, Financial Audit Agent, Payroll Agent, Recruiting Agent, and Talent Mobility Agent. Customers will be able to easily deploy and manage these agents through the Workday ASOR.

Workday Illuminate: AI to Power the Future of Work

Illuminate is the next generation of Workday AI. Built on the largest and cleanest HR and financial dataset – fueled by more than 1 trillion transactions a year – Illuminate understands the business context around the data to transform business operations by elevating humans, accelerating finance, and managing an organization's entire fleet of AI agents. From skills to performance, goals, cost and ROI metrics, organizational models, and individual identities, Illuminate has deep contextual understanding of how work gets done. This leads to measurable business impact, such as faster decision-making, better workforce planning, and improved productivity.

Support from the Workday Agent Partner Network

"AWS is powering the future of AI agent development through Amazon Bedrock's comprehensive foundation model ecosystem and enterprise-grade development framework," said **Swami Sivasubramanian, Vice President of Agentic AI, AWS**. "With Workday's Agent System of Record, organizations will be much better positioned to ethically manage all these agents. We're excited to collaborate with Workday to reshape the future of work through agentic AI. Together, we'll empower organizations to unlock exponential value while maintaining our shared commitment to security and responsible AI."

"Through Deloitte's strategic alliance with Workday, our AI agents will enable organizations to address their specific needs and industry processes to drive efficiency while maintaining quality," said **Abdi Goodarzi, U.S. Chief Commercial Officer for Zora AI, Deloitte**. "These agents have the ability to perceive, reason, and act and are transforming enterprises by orchestrating workflows and enabling human workforces to make better informed decisions across functions like finance, HR, tax, and more."

"Digital colleagues, or AI agents, will become an increasingly common addition to the workforce, and Workday's Agent System of Record is well positioned to help organizations meet the moment of monumental change," said **Steve Chase, Vice Chair of AI and Digital Innovation, KPMG LLP**. "We're thrilled to collaborate with Workday to help our shared clients manage the new digital workforce with confidence just as they do full-time employees and contractors."

"The Workday Agent System of Record marks a meaningful step toward making AI not just available, but truly usable – transparent, trusted, and tightly integrated into business workflows," said **Matt Wood, U.S. and Global Commercial Technology and Innovation Officer, PwC**. "Our collaboration with Workday helps clients embed AI agents where they can drive measurable impact, from compliance to cost optimization. By focusing on real outcomes over hype, we're helping clients turn AI from an experiment into a durable advantage."

Agent Gateway will be available to early adopter customers by the end of 2025.
